

Pneumatic service kit Model CPG-KITP

WIKA data sheet CT 93.01

Applications

- Oil and gas industry
- Maintenance and service facilities
- Calibration service companies and service industry
- Simple calibrations directly on site

Special features

- Testing and adjustment of pressure gauges, pressure sensors, pressure switches or safety valves
- Reference instrument model CPG1500 with 0.05 % FS
- Pneumatic version up to 40 bar (max. pressure generation with hand test pump -950 mbar ... 35 bar (-13.5 ... 500 psi))
- Clear and simple operation

Pneumatic service kit, model CPG-KITP

Description

Application range

The CPG-KITP pneumatic service kit is the ideal tool for the pneumatic testing, adjustment and calibration of mechanical and electronic pressure measuring instruments through comparative measurements or for the setting of pressure switches. These and other tests can take place quickly and reliably in the laboratory or workshop, or on site at the measuring point. With the service kit, service and maintenance are more complete, safer and more flexible. The kit is high-quality finish, handy and robust and is also suitable for service use.

Components

The service kit consists of a pneumatic hand test pump for the generation of a defined test pressure and also a highly accurate model CPG1500 precision digital pressure gauge as a reference instrument. Air is used as the pressure medium. Various connection adapters are also available in the test case. All components are carefully stowed in the case and protected for in-house transport.

Simple function

If one connects the test item and the model CPG1500 precision digital pressure gauge to the test pump, on actuating the pump, the same pressure will act on both instruments. Using the fine adjustment valve, the test pressure is set exactly. By comparison of the two measured values at any given pressure value, a check of the accuracy and/or adjustment of the pressure measuring instrument under test can be carried out.

WIKA-CAL software

The collected data from the data logger of the digital pressure gauge can be transmitted wirelessly to the WIKA-CAL calibration software for further evaluation. WIKA-CAL also offers, over and above PC-supported calibration, the management of the calibration and instrument data in an SQL database. A WIKA-Wireless interface is available for the data transfer.

Specifications

Specifications	Metric version CPG-KITP-EUxx-ZZ	Imperial version CPG-KITP-USxx-ZZ
CPG1500		
Pressure range	See ordering information	
Pressure connection	G ½ male thread	¼ NPT male thread
Wetted parts	Stainless steel	
CPP30		
Pressure range	-0.95 ... 35.0 bar	-13.5 ... +500 psi
Pressure transmission medium	Air	
Pressure connection	G ½ female thread for reference instrument, freely rotating, hose with G ¼ female thread for test item	¼ NPT female thread via adapter for reference instrument, hose with ¼ NPT via adapter for test item
Fine adjustment	Fine adjustment valve	
Material	Chrome-plated brass, anodised aluminium, high-strength plastic	
Dimensions (L x W x H)	220 x 105 x 63 mm (8.66 x 4.13 x 2.48 in)	
Weight	0.51 kg (1.12 lbs)	
Standard accessories	Test item connection hose; length 0.5 m (1.64 ft)	

Certificates

Certificate	
Calibration	Standard: 3.1 calibration certificate per EN 10204 Option: DKD/DakkS calibration certificate
Recommended recalibration interval	1 year (dependent on conditions of use)

Approvals and certificates, see website

Various test connections

Dimensions in mm (in)

CPG1500 without protective rubber cap

Pneumatic hand test pump model CPP30

- ① G ½ female connection, freely rotating for reference instruments
- ② Fine adjustment valve
- ③ Pressure relief valve
- ④ Toggle control, pressure/vacuum generation
- ⑤ Pump handles
- ⑥ Adjustable knurled nut for setting the pump performance (overpressure protection)
- ⑦ G ½ female connection, freely rotating for test items
- ⑧ Test item connection hose, length 0.5 m

WIKI-CAL calibration software

Easy and fast creation of a high-quality calibration certificate

The WIKI-CAL calibration software is used for generating calibration certificates or logger protocols for pressure measuring instruments and is available as a demo version for a cost-free download.

A template helps the user and guides him through the creation process of a document.

In order to switch from the demo version to a full version of the respective template, a USB stick with the template has to be purchased.

The pre-installed demo version automatically changes to the selected full version when the USB stick is inserted and is available as long as the USB stick is connected to the computer.

- Creation of calibration certificates for mechanical and electronic pressure measuring instruments
- A calibration assistant guides you through the calibration
- Automatic generation of the calibration steps
- Generation of 3.1 certificates per DIN EN 10204
- Creation of logger protocols
- User-friendly interface
- Languages: German, English, Italian and more due with software updates

For further information see data sheet CT 95.10

Calibration certificates can be created with the Cal-Template and logger protocols can be created with the Log-Template.

Cal Demo

Generation of calibration certificates limited to 2 measuring points, with automatic initiation of pressures via a pressure controller.

Cal Light

Generation of calibration certificates with no limitations on measuring points, without automatic initiation of pressures via a pressure controller.

Log Demo

Creation of data logger test reports, limited to 5 measured values.

Log

Creation of data logger test reports without limiting the measured values.

A sample calibration certificate generated by the Cal Demo software. It includes fields for 'Calibration certificate', 'Date', 'Time', 'Object', 'Measuring point', 'Measuring range', 'Measuring unit', 'Measuring instrument', 'Measuring method', 'Measuring conditions', 'Measuring results', and 'Signature'. The certificate is for a pressure measuring instrument.A sample calibration certificate generated by the Cal Light software. The certificate is for a pressure measuring instrument.A sample logger protocol generated by the Log Demo software. It includes fields for 'Logger protocol', 'Date', 'Time', 'Object', 'Measuring point', 'Measuring range', 'Measuring unit', 'Measuring instrument', 'Measuring method', 'Measuring conditions', 'Measuring results', and 'Signature'. The protocol is for a data logger.

Scope of delivery

- Precision digital pressure gauge model CPG1500
- Pneumatic hand test pump model CPP30
- Adapter set
- Protective rubber cap for model CPG1500
- Case with matching foam insert for CPG1500, CPP30 and adapter set
- Operating instructions CPG1500 and CPP30

Options

- DKD/DAkkS calibration

Accessories

- WIKA-CAL calibration software
- WIKA-Wireless USB stick
